

# Hold like a basket and release like a grasper.

## NGage<sup>®</sup>

NITINOL STONE EXTRACTOR

### **Nitinol construction**

Completely and consistently open the extractor to remove large stones and fragments and to disengage a stone when necessary.

### **Choice of open diameters**

Treat a variety of stone sizes throughout the urinary tract.

### **Small sizes**

Increase flow, enhance visibility, and improve deflection through flexible ureteroscopes.

## NGage®

NITINOL STONE EXTRACTOR

Use the NGage Nitinol Stone Extractor for ureteral stone extraction. It's not just a grasper or a stone basket—it's a combination of the two. The patented design allows you to engage, reposition, release, and extract stones of various sizes throughout the urinary tract. The NGage is highly flexible, kink resistant, and durable—a combination that makes it the optimal stone retrieval device for multiple clinical applications.

The NGage has 50% greater retention strength than traditional graspers.<sup>1</sup> In a calyceal model, the NGage demonstrated a superior ability to release simulated stone fragments in comparison to both standard and multi-wire nitinol baskets.<sup>2</sup>
